UNO Flex System

Inspire your innovative thinking with our Stylish UNO Flex System

UNO-Flex design approach is focused to combine your office space and lab work area and enhance your laboratory performance.

Modular bench assemblies creates unique workstation equipped with features that make it customisable to your specific needs, Core assemblies can be anchored to the floor providing rigid support for the table frames and storage components.

Workstations can be up to **1650mm** deep for Island benches and up to **900mm** for Wall benches, working heights can be **750mm** or **900mm** to adapt to personnel, equipment and procedures inside your lab.

Island cores and wall cores are specially designed for applications requiring major services such as water, gas, vacuum, electricity or data outlets. Cores are **150mm** wide and come in multiple configurations and heights.

Storage cabinets are available in mobile units, Upper cabinets & Adjustable height shelving can be used to provide additional storage capacity above the work surface.

Wall Bench

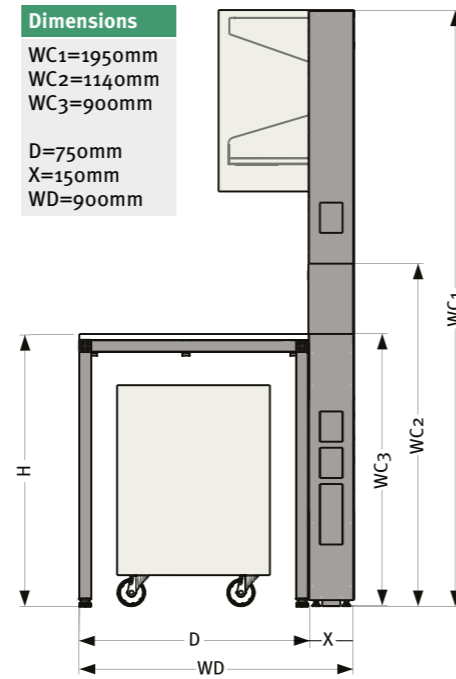

These Wall Benches are specially designed to meet all engineering standards and come in three different core heights. Our cores produced from heavy-duty steel sheets using state of art machinery, latest material & technology.

All cores features the possibility of routing all possible combinations of electromechanical connections across 150mm core depth with special horizontal and vertical routes with easy access for maintenance.

This system comes with elegant UNO frame design capable of the worktop up to 900mm deep. Workstations can be up to 900mm for wall benches, working heights can be 750mm or 900mm to adapt to personnel, equipment and procedures inside your lab.
