

COMPANY PROFILE

Maani Solar is a MENA based company that specializes in the delivery of turn-key PV solar renewable energy solutions using revered German technologies.

This includes the complete engineering, procurement, installation, testing, commissioning, operation & maintenance of photovoltaic solar systems that are fit to offset almost any electrical demand.

Such solutions range from medium – to – large scale commercial and industrial demands to municipal and utility scale projects.

With heavy reliance on its extensive years of engineering experience and in-house expertise, the Maani Solar team is committed to excellence.

OUR SERVICES

Consumption and load analysis

Site surveys and studies

PV system design and engineering

Project planning

Procurement

Turnkey construction; civil, mechanical, electrical

Plant Operation and Maintenance

Feasibility Studies

Local authority approval processing

Finance facilitation

OUR CORE COMPETENCIES

- +35 years business experience
- Contracting and manufacturing background
- In-house engineering capabilities
- All round engineering expertise; civil, mechanical, electrical
- Financial stability
- Internationally renowned solar components

OUR PRODUCTS

Our products are carefully selected on project basis depending on the best suited technology for each demand. Such products are procured from internationally renowned sources with a proven track record and a guaranteed performance.

Naming a few include IBC SOLAR for European made modules and china's based tier 1 TRINA SOLAR along with SMA for inverters and global experts Schletter of Germany for mounting systems.

When needed, our sister company "maani STEEL" experts in the design and manufacture of steel structures supply almost any form of specialized structures needed for elevated mounting.
